In 2019 SOME's Dining Room served 295,642 meals. This was made possible by staff and nearly 8,700 Dining Room volunteers.

Poverty

• Washington, DC has about 700,000 residents. The U.S. Census Bureau estimates that about **13.5% of the DC population is below the federal poverty level**, which was \$20,244 for a three-person household in 2020. Additionally,

- **9%** are below 50% of the poverty level
- **19.8%** are below 125% of the poverty level
- About **25.6%** of African-American residents, **12%** residents of Hispanic or Latino origin, and **30.5%** of persons with a disability, are at 100% of the poverty level.

• **The child poverty rate in DC is 24%, contrasted with 18.5% nationally** (U.S. Census Bureau 2020).

- Since 2000, the Fair Market Rent for a two-bedroom apartment in DC has more than doubled (U.S. Department of Housing and Urban Development data 2001-2018). Although the DC minimum wage is **\$15** an hour, a worker would need to earn **\$32.83** an hour to afford a two-bedroom apartment in DC (www.nlihc.org/oor/district-columbia).

• Approximately **40,000 households** in DC are on official waiting lists for housing assistance. Their estimated wait time is more than 20 years. (2019 Five-Year Plan to End Homelessness in the District of Columbia).

Homelessness

- The total number of homeless persons counted in DC on one winter night in 2020 was **6,380, including 1,422 children**. The oldest person was **age 86**. **309 were veterans**. **86.4% of persons counted as homeless were Black** (The Community Partnership for the Prevention of Homelessness, 2020).

Homeless adults in DC

- 21% were employed but could not afford housing
- 20.3% reported severe mental illness
- 19.8% reported domestic violence history [43.4% of women] including 40.1% who were homeless directly because of domestic abuse
- 9.3% reported chronic substance abuse
- 22.4% reported chronic health problems
- 20.3% reported physical disabilities
- 13.3% reported both chronic substance abuse and severe mental illness.
- Permanent housing, such as that provided by SOME, is a crucial intervention. On the night of the 2020 Point in Time count, **4,497 formerly homeless individuals and 2,238 formerly homeless families were in permanent housing**. Also, 348 veterans were housed in the previous year. (The Community Partnership for the Prevention of Homelessness, 2020).

Hunger

- According to the DC Food Policy Council (2020) **16.7% of DC residents lack consistent access to enough food** for an active, healthy life—an increase from 10.6% in 2018. **Food insecurity spiked 21.1% of District residents in May 2020** when the impact of COVID-19 was the greatest. More than **16.7%** of DC households with children experience food hardship. This figure is one of the highest in the country. (FRAC, Food Hardship in America, 2020).
- Food insecurity exacerbated by COVID-19 is likely to disproportionately affect Black, senior, undocumented, and unhoused populations (DC Food Policy Council, 2020).
- The disproportionality of food insecurity is worsened still by the presence of **only three full-service grocery stores in Wards 7 and 8** (DC Hunger Solutions, 2020). Wards 7 and 8, which are the Wards with the highest percentage of Black residents, also have the **highest percentage of individuals below the poverty line, limited transportation options for accessing food in other wards, and significantly worse health outcomes, including higher death per capita rates from COVID-19**.
